

# Transfer Opportunity Clinical Psychologist II

## Mental Health / Primary Care Collaboration Programs

The Clinical Psychologist II (CPII) will participate in the countywide implementation of the Mental Health Integration Program (MHIP), a stepped, collaborative care evidence-based practice for treatment of mild to moderate depression, anxiety and trauma in primary care settings. The CPII role will provide support and technical assistance to implementing providers; monitor clinical and outcome data, and collaborate with the University of Washington in the training and certification process for participating clinicians.

### Desirable qualifications include:

- Experience providing mental health services to adults and/or older adults
- Experience in providing short-term, focused or evidence-based treatment interventions
- Ability to assist providers in adapting to new service delivery and treatment model
- Excellent interpersonal skills and ability to work effectively with multidisciplinary providers
- Flexibility and interest in assisting in the continued development of the integrated care programs
- Excellent oral and written communication skills
- Familiarity with Microsoft Outlook, Word, Excel
